

This place should be Indian style garden and also should be peaceful and tranquil, therefore, I collected some special elements about Indian and tranquil. Some ideas come from their traditional culture such as lotus, blue peacocks, bodhi trees. In this plan, the pillar's color come from Indian flag which have orange, white, and green colors. There are four blue peacock sculptures in the four garden corners, because the blue peacock is Indian national bird and may give Indian people familiar feelings about their home town. Lotuses are Indian national flowers, thus, in the center of the garden is a big lotus building and water pond, because There are a lot of bodhi trees enclose this garden, which means people's life never dead and always rebirth which is the important belief and philosophy for Indian people. Indian people like green color, so this garden's base color is green. But I put some cherry trees which have pink color in this garden in order to decorate the green garden to make it dynamic and colorful. All of those are recycle material such as woods and stones, it can sustainable.
